

I Am Having Symptoms of Cardiovascular Disease

If you think your symptoms may be a sign of a medical emergency, call 911 and ask to be taken to an emergency room for evaluation. Do not drive yourself to the emergency room.

Hospital Emergency Department Visit

We sincerely hope you never need to go to the Emergency Room. However, should you need to do so for a heart issue, please make sure to tell the Emergency Room physicians and staff that you are a CVAM patient (or have your family do so) and want to be seen by one of our doctors. In this way, we, who are familiar with you and your heart history, can care for you while you are in the hospital. In addition, we can provide for a smooth transition for your follow-up care at our office.

For your reference, our physicians see patients at Banner Heart Hospital, Banner Baywood, Banner Gateway, Banner Goldfield, Banner Ironwood and have privileges at Gilbert Hospital and Florence Hospital at Anthem.

Again, we hope you never have to go to the Emergency Room. But, if you do, please let us take care of you! It will be nice to see a familiar face!

Office Visit

If you are experiencing any of the following symptoms, please make an appointment by calling our office at (480) 641-5400 or through our secure patient portal.

- Chest pain
- Shortness of breath
- Pain or swelling in the legs
- Leg pain with walking
- Fatigue
- Irregular heartbeat
- Dizziness or fainting
