

“It is an honor and privilege to practice medicine and the physician-patient relationship is what makes my job so special. I believe that each patient is unique and deserves an individualized treatment plan, which we have worked together to create. I strive to spend time at each visit to ensure we have addressed pertinent concerns, so my patients feel comfortable, confident, and empowered to improve their cardiovascular and overall health. I look forward to building a collaborative relationship with each of my patients, as we are in this together!”
